Unless otherwise specified, the Contractor shall prepare each appraisal review report in a narrative format. The content of each appraisal review report must be consistent with the intended use. Changes to the report format, content, and/or frequency shall require approval by the State Agency's Representative.

The thoroughness of appraisal reviews varies greatly and therefore the State Agency will rely on the Seven Levels of analysis as presented in the 11<sup>th</sup> Addition for *The Appraisal of Real Estate*, published by the Appraisal Institute, 1999, page 693. The described *Levels* are presented below.

Level 1.	The report is merely scanned
Level 2.	The mathematical calculations are checked and the data is examined for its reasonableness.
Level 3.	Selected pertinent sections of the report are read.
Level 4.	The appraisal is checked to ascertain that the methodology is appropriate.
Level 5.	The entire report is read thoroughly.
Level 6.	Limited confirmation of market data is attempted.
Level 7.	Full confirmation of market data is attempted.

The State Agency shall establish the level of review and shall have final approval for the report content and submission deadline for progress and/or final reports. It is the State's intention to contract out appraisal review assignments requiring an analysis employed under Levels 5, 6, and 7.

As part of a review assignment, the State Agency may request the Contractor to develop and report a separate opinion of value.

Appraisal review work shall be performed for a State Agency only by the Contractor. Appraisal reviews may be completed without a field inspection of the subject property. However, upon the request of the State Agency, the Contractor shall physically inspect the subject property appraised and all comparable properties utilized in completing the appraisal assignment. Other staff members of the Contractor may provide significant assistance in the areas of research, inspections, preparation of exhibits, and acting as the appraiser's assistant. Credit for the assistant's contributions must be given in the report. However, the analysis and/or value conclusions (if requested) must be those of the Contractor. As such, only the Contractor may sign the appraisal review and the Certification.

If the Contractor is required to make corrections, the Contractor shall review the revised appraisal and deliver the appraisal review report to the State Agency on the time and date specified.

The Contractor must provide written justification to the State Agency if additional time is necessary to complete the appraisal review. Additional time will be considered only if appraisal corrections caused a delay in the review process.

The Contractor shall perform a quality review of the report (including all mathematical computations, grammar, and valuation methodology) prior to submitting the report to the State Agency.
